

MBG

pg 9

make clear the origins of the  
crisis - the motives that lead to  
the attempted FA, for K or SH or  
JFK.....

~~///~~ ///

wf do leaders miss / fail to foresee  
the risk of, response to this means to  
humiliate another statement [who is not in  
the state - not deferential ...]

MBG hyp: Men who want this power have  
an arrogance which blinds them to  
the power of the other guy, or to  
"put themselves in other guy's shoes" -

they are filled with 2) rage at ineptitude,  
endangerment, (b) even if they are power in

the own country etc

---

If instead clearly, implicitly, furiously  
to anyone — in the system — or outside —  
who 2) fails to show proper deference

(b) often because "he" is trying to  
change states (to more equality, or  
high-~~the~~-~~higher~~ states, not improving)

a (c) to gain recognition of a higher  
states already earned/deserved.

---

SH was not an candidate

2) to control Kuwait

still less (b) to control SA: join core,  
taking away US power, over SA  
(<sup>own</sup> ~~power~~, etc.)

SH was trying to 2) avoid falling back;  
gain equality or hegemony = Arab League;  
b) fall into core (Hitler) (control SA and  
+ Kuwait)

Two

Thoughts

Finley: in "crisis" situations

- choice-responsing shifts

- to "those" less concerned about (cons of)  
violence, danger to others (crisis)  
risk is long-run, "big picture,"  
multiple, broad constituencies ("superiors")

to those

- more apt to use violent, aggressive means

(Koeuth, a "superior brain," spiral cord

a negative

- any set-back, "bottom-line judgment,  
evaluation" is regarded as if it were as bad  
as of old: a disaster, catastrophe  
whether or not it involves

- physical harm

- " " " to others

- " " " " outside them  
or outside "enemies"

- loss to oneself (the chosen) alone, or to "society"

- esp. for humanitarian mergers, dealing with  
paper: little awareness of distinction between  
threats, demands, wounds, wounds as means  
and bombes " "

(CE vs. RT: TCS observes difference).

Hyp: What defines a crisis — producing above  
"set", consequences —

is the imminence of a better-life,

- on audit

- on exposure<sup>to</sup>, a witnessing  
public, a judge, peers

- a "test"

that will lead to an evaluation, a summing-up,  
a recorded judgment...

This is why (datum:) CII had the same feel to  
staff participants as "usual" daily/weekly/monthly  
"crises," usually coming round at a time, overlapping...

In this (present) situation, above characteristics  
occur

(Postponing / heightening consideration of l-r effects,  
laws, others...

> (A special degree of routine, process, that encourage)  
frame of COW: <sup>esp. long-term...</sup> Military-made, or military-determined  
judgments and decisions influenced

(see John. IS Hunt Sharp, Aug 4, 1964)

- or (since military have been

constantly influenced, in Nicaragua, Lebanon...)

"militarized actions"; "machines"

see | END | machines
